

Proper Gender

Everyday ways to be prepared.

If instead of seeing terrorists everywhere you normally see a green arrow walking up a staircase with four steps, you should probably consult a doctor.

Just because you can't hear the terrorists lurking behind you, doesn't mean that they aren't there.

If this is what your luggage looks like, you may actually be a terrorist.

Floating fire extinguishers with clip art symbolizing flames is basically a 100% indicator that all the people around you are actually terrorists.

Why Transit Watch?

The name *Transit Watch* is a subtle example of propaganda, which gives us a politically correct way of implying that you should all inform on your neighbors, assume the worst of strangers, and generally live in fear no matter what.

See something? Say something.
